Contents

Preface vii

Introduction 1

1 Basic components 15
- 1A The auxiliary games map . . . 16
  - 1A(1) Types . . . 16
  - 1A(2) The rules of the game . . . 20
- 1B Generic runs . . . 23
- 1C Pivots . . . 27
  - 1C(1) The game $\mathcal{A}_{\text{piv}}[x]$ . . . 28
  - 1C(2) Constructing $\sigma_{\text{piv}}[\varrho, x]$ . . . 30
  - 1C(3) Properties of σ_{piv} . . . 35
- 1D Mirror images . . . 37
- 1E Sample application . . . 39
- 1F Mixed pivots . . . 43
  - 1F(1) The game . . . 43
  - 1F(2) The strategy $\sigma_{\text{mix}}[\varrho, x]$ . . . 48
  - 1F(3) Properties of σ_{mix} . . . 49

2 Games of fixed countable length 51
- 2A General games and iteration games . . . 51
- 2B Limits . . . 56
  - 2B(1) The basic definitions . . . 57
  - 2B(2) I wins . . . 59
  - 2B(3) II wins . . . 65
  - 2B(4) The third case . . . 66
  - 2B(5) Summary . . . 68
- 2C Successors . . . 68
- 2D Limits again . . . 73
  - 2D(1) II wins . . . 75
  - 2D(2) I wins . . . 79
  - 2D(3) Determinacy . . . 80
- 2E Universally Baire sets . . . 82

3 Games of continuously coded length 87
- 3A Codes . . . 87
- 3B First determinacy result, part I . . . 89
  - 3B(1) Names . . . 89
  - 3B(2) The basic step . . . 93

3B(3) I wins . . . 96
3B(4) Discussion . . . 104
3B(5) Internal ultrapowers vs. copying . . . 106
3C First determinacy result, part II . . . 109
3C(1) II wins . . . 109
3C(2) Determinacy . . . 112
3D A slight improvement . . . 119
3D(1) $\mathbf{\Sigma}^0_2$ functions . . . 120
3D(2) $\mathbf{\Sigma}^0_{1+\alpha}$ functions . . . 124
3E Variation . . . 124
3E(1) A sketch of the proof . . . 129

4 Pullbacks 135
4A Codes . . . 135
4B Woodin's extender algebra . . . 141
4C Names, part I . . . 155
4C(1) Removing obstructions . . . 155
4C(2) Relative successors . . . 157
4C(3) Relative limits and records . . . 158
4D Names, part II . . . 162
4D(1) Woodin limits of Woodin cardinals . . . 162
4D(2) Relative successors . . . 165
4D(3) Compositions . . . 166
4D(4) Summary . . . 166
4E Mirror images . . . 167
4E(1) Removing obstructions . . . 167
4E(2) Mirrored successor game . . . 168
4E(3) Relative limits and records . . . 169
4E(4) Woodin limits of Woodin cardinals . . . 172
4E(5) Relative successors . . . 173
4E(6) Compositions . . . 174
4E(7) Summary . . . 174

5 When both players lose 175
5A Saturation . . . 175
5B Successors, basic step . . . 181
5C Relative limits . . . 183
5C(1) Basic step . . . 183
5C(2) Construction . . . 187
5D Woodin limits of Woodin cardinals . . . 194
5D(1) Basic step . . . 194
5D(2) Impossibility . . . 197
5D(3) Another impossibility . . . 199
5D(4) Construction . . . 201

5E Relative successors . . . 204
5F Compositions . . . 205
5G Conclusion . . . 207

6 Along a single branch 209
6A The game . . . 209
6A(1) How to leap . . . 215
6A(2) The skipping game . . . 218
6B Successors, basic step . . . 220
6C Relative limits . . . 221
6C(1) Finite . . . 222
6C(2) Infinite . . . 225
6C(3) Construction . . . 228
6D Woodin limits of Woodin cardinals . . . 235
6D(1) Hopeful . . . 235
6D(2) Not hopeful . . . 240
6D(3) Combined . . . 242
6E Relative successors and compositions . . . 244
6F Skips . . . 248
6F(1) Routes . . . 249
6F(2) Extensions . . . 255
6F(3) Closing skips . . . 258
6F(4) Discussion . . . 260
6F(5) Safe positions . . . 262
6F(6) The strategy . . . 264
6G Conclusion . . . 266

7 Games which reach local cardinals 268
7A Shifted payoff . . . 268
7B Layout . . . 270
7B(1) Extensions . . . 276
7C Basic step . . . 277
7C(1) Obstruction free . . . 280
7C(2) I-acceptably obstructed . . . 281
7C(3) Summary . . . 284
7D Construction . . . 285
7E The main theorem . . . 289
7F Determinacy . . . 292

A Extenders, generic extensions, and iterability 300

Bibliography 309
