

GENERAL INFORMATION

TEXT: J. Rogawski, *Single Variable Calculus*, Freeman, 2008

OFFICE HOURS: Information about the office locations and office hours of the instructor and teaching assistants will be posted on the course Web site (see below) as soon as it is available. All students are invited to attend the office hours of all the teaching assistants as well as the instructor.

HOMEWORK: The assignments can be found in the **HOMEWORK ASSIGNMENTS** list on the reverse of this page. Homework problems are not to be handed in, but should be done carefully since they will be the basis for the weekly quizzes.

DISCUSSION SECTION: The main purpose of the section is to administer a quiz that consists of one problem from the homework assignments. The quizzes will be graded and returned to you at the following week's discussion section meeting. Teaching assistants will also answer questions concerning the lectures and the text and, as time permits, discuss homework problems. The first quizzes will take place during the week of October 5.

EXAMINATIONS: Examinations and quizzes will be closed book and no calculators may be used, but a blank 3" by 5" card will be supplied for each examination, on which you may write any notes you wish. The first midterm will be on Friday, October 30 and the second midterm on Friday, November 20. The final exam is on Wednesday, December 9, from 8:00 to 11:00. More detailed information about each examination will be distributed well before the exam. In particular, this information will include the **locations** of the examinations, which may be different from the course lecture room.

GRADING: The quizzes count 10% of the grade, each midterm counts 20% of the grade and the final counts 50%. The Mathematics Department uses plus-minus grading, that is: A+, A, A-, B+, B, B-, etc.

WEB SITE: You can access the Mathematics 31A/2 home page at

<http://www.math.ucla.edu/~rfb/31a.2.09f>

The home page will contain the handouts for the course as they are distributed. Sample examinations and their solutions will be posted on the Web site before each examination. After each examination in the course is graded, its solutions will be posted also.

ENROLLMENT PROBLEMS: All questions regarding enrollment in this course should be addressed to the Mathematics Department's Undergraduate Advisor, Connie Jung, whose office is Math Sci 6356 and who can be reached at connie@math.ucla.edu.
