Math 3C (Spring 2007)
Calculus and Probability for Life Sciences Students
Instructor: Roberto Schonmann
www.math.ucla.edu/~rhs

Time/Place:
   Lecture 1: MWF   9:00-9:50 in MS 4000A.
   Lecture 2: MWF   10:00-10:50 in MS 4000A.

Text: "Calculus for Biology and Medicine" (second edition) by Claudia Neuhauser (Math 3C covers Chapter 12).

Office hours: M 1:00 - 2:00, W 11:00-11:50 in MS 6156.

Examinations: There will be a midterm exam, on Monday, May 7, and a final exam. A picture id will be required in the exams. Exams will only be offered at the designated times, and there will be no make-up exams. If a student misses the midterm, then the score in the final exam will replaced the score of the midterm.

Homework: I will assign homework weekly, by Friday. The homework should be turned in by the end of the lecture on the following Friday. No late homework will be accepted, but in computing the average homework score, the lowest two homework scores will be dropped.

Grading: The homework counts 20% of the grade, the midterm exam counts 30% of the grade and the final exam counts 50% of the grade. However if the student's final exam score is better than the midterm exam score, then the final exam score will replace the midterm exam score in this computation.

Use of the UCLA Gradebook: The scores in homework sets, midterm exam and the final exam will be posted promptly on the gradebook. Students are expected to report any discrepancy promptly. After each homework set or midterm exam is returned to the students, they are expected to report any problem with grading within a week.

Incompletes: The grade incomplete will only be given in very special cases, in which a student who is doing well in the course cannot take the final exam for a very serious and documented reason.
