

List of Publications

Roberto H. Schonmann

- (1) J.F.Perez, R.H.Schonmann: On the global character of some local equilibrium conditions - a remark on metastability. *Journal of Statistical Physics* **28**, 479-485 (1982).
- (2) R.H.Schonmann: Metastability for the contact process. *Journal of Statistical Physics* **41**, 445-464 (1985).
- (3) R.H.Schonmann: Central limit theorem for the contact process. *The Annals of Probability* **14**, 1291-1295 (1986).
- (4) R.H.Schonmann, M.E.Vares: The survival of the large dimensional basic contact process. *Probability Theory and Related Fields* **72**, 387-393 (1986).
- (5) R.H.Schonmann: A new proof of the complete convergence theorem for contact processes in several dimensions with large infection parameter. *The Annals of Probability* **15**, 382-387 (1987).
- (6) R.H.Schonmann: Absence of a stationary distribution for the edge process of subcritical oriented percolation in two dimensions. *The Annals of Probability* **15**, 1146-1147 (1987).
- (7) R.H.Schonmann: The asymmetric contact process. *Journal of Statistical Physics* **44**, 505-534 (1986).
- (8) J.L.Lebowitz, R.H.Schonmann: Pseudo free energies and large deviations for non-Gibbsian FKG measures. *Probability Theory and Related Fields* **77**, 49-64 (1988).
- (9) R.Durrett, R.H.Schonmann: Stochastic growth models. in *Percolation Theory and Ergodic Theory of Infinite Particle Systems*. The IMA volumes in mathematics and its applications, vol. 8, H.Kesten, ed. (Springer Verlag, 1987), pp. 85-119.
- (10) R.H.Schonmann: A new look at contact processes in several dimensions. in *Percolation Theory and Ergodic Theory of Infinite Particle Systems*. The IMA volumes in mathematics and its applications, vol. 8, H.Kesten, ed. (Springer Verlag, 1987), pp. 245-250.
- (11) M.Bramson, P.Calderoni, A. DeMasi, P.A.Ferrari, J.L.Lebowitz, R.H.Schonmann: Microscopic selection principle for reaction diffusion equation. *Journal of Statistical Physics* **45**, 905-920 (1986).
- (12) J.L.Lebowitz, R.H.Schonmann: On the asymptotics of occurrence times of rare events for stochastic spin systems. *Journal of Statistical Physics* **48**, 727-751 (1987).
- (13) R.Durrett, R.H.Schonmann: The contact process on a finite set II. *The Annals of Probability* **16**, 1570-1583 (1988).
- (14) R.Durrett, R.H.Schonmann: Large deviations for the contact process and two dimensional percolation. *Probability Theory and Related Fields* **77**, 583-603 (1988).
- (15) R.H.Schonmann: Second order large deviation estimates for ferromagnetic systems in the phase coexistence region. *Communications in Mathematical Physics*

- 112**, 409-422 (1987).
- (16) J.T.Chayes, L.Chayes, R.H.Schonmann: Exponential decay of connectivities in the two dimensional Ising model. *Journal of Statistical Physics* **49**, 433-445 (1987).
 - (17) R.H.Schonmann: Projections of Gibbs measures may be non-Gibbsian. *Communications in Mathematical Physics* **124**, 1-7 (1989).
 - (18) J.T.Chayes, L.Chayes, G.Grimmett, H.Kesten, R.H.Schonmann: The correlation length of the high density phase of Bernoulli percolation. *The Annals of Probability* **17**, 1277-1302 (1989).
 - (19) R.H.Schonmann: Exponential convergence under mixing. *Probability Theory and Related Fields* **81**, 235-238 (1989).
 - (20) R.H.Schonmann: On two correlation inequalities for Potts models. *Journal of Statistical Physics* **52**, 61-67 (1988).
 - (21) R.Durrett, R.H.Schonmann, N.I.Tanaka: The contact process on a finite set III. The critical case. *The Annals of Probability* **17**, 1303-1321 (1989).
 - (22) R.Durrett, R.H.Schonmann, N.I.Tanaka: Correlation lengths for oriented percolation. *Journal of Statistical Physics* **55**, 965-979 (1989).
 - (23) J.Bricmont, H.Kesten, J.L.Lebowitz, R.H.Schonmann: A note on the large dimensional Ising model. *Communications in Mathematical Physics* **122**, 597-607 (1989).
 - (24) H.Kesten, R.H.Schonmann: Behavior in high dimensions of Potts and Heisenberg models. *Reviews in Mathematical Physics* **1**, 147-182 (1990).
 - (25) M.Bramson, R.Durrett, R.H.Schonmann: The contact process in a random environment. *The Annals of Probability* **19**, 960-983 (1991).
 - (26) E.D.Andjel, R.B.Schinazi, R.H.Schonmann: Edge processes of one dimensional stochastic growth models. *Ann. inst. H. Poincaré, Sect B (Probab. and Statist.)* **26**, 489-506 (1990).
 - (27) R.H.Schonmann: On the behavior of some cellular automata related to bootstrap percolation. *The Annals of Probability* **20**, 174-193 (1992).
 - (28) E.J.Neves, R.H.Schonmann: Critical droplets and metastability for a Glauber dynamics at very low temperatures. *Communications in Mathematical Physics* **137** 209-230 (1991).
 - (29) R.H.Schonmann: Critical points of two-dimensional bootstrap percolation like cellular automata. *Journal of Statistical Physics* **58**, 1239-1244 (1990).
 - (30) R.H.Schonmann, N.I.Tanaka: One-dimensional caricature of phase transition. *Journal of Statistical Physics* **61**, 241-252 (1990). Errata published in *Journal of Statistical Physics* **64**, 477 (1991).
 - (31) E.J.Neves, R.H.Schonmann: Behavior of droplets for a class of Glauber dynamics at very low temperature. *Probability Theory and Related Fields* **91**, 331-354 (1992).
 - (32) R.H.Schonmann: Finite size scaling behavior of a biased majority rule cellular automaton. *Physica A* **167**, 619-627 (1990).
 - (33) R.H.Schonmann: An approach to characterize metastability and critical droplets in stochastic Ising models. *Ann. inst. H. Poincaré, Sect A (Phys. Théor.)* **55** 591-600 (1991).

- (34) P.A.Ferrari, A.Frigessi, R.H.Schonmann: Convergence of some partially parallel Gibbs samplers with annealing. *The Annals of Applied Probability* **3** 137-153 (1993).
- (35) R.H.Schonmann: The pattern of escape from metastability of a stochastic Ising model. *Communications in Mathematical Physics* **147** 231-240 (1992).
- (36) E.D.Andjel, T.S.Mountford, R.H.Schonmann: Equivalence of exponential decay rates for bootstrap-percolation-like cellular automata. *Ann. inst. H. Poincaré, Sect B (Probab. and Statist.)* **31** 13-25 (1995).
- (37) N.Madras, R.B.Schinazi, R.H.Schonmann: On the critical behavior of the contact process in deterministic inhomogeneous environment. *The Annals of Probability* **22** 1140-1159 (1994).
- (38) R.H.Schonmann: Relaxation times for stochastic Ising models in the limit of vanishing external field at fixed low temperatures. in *Cellular Automata and Cooperative Systems*. NATO ASI Series. Series C: Mathematical and Physical Sciences - Vol.396. N.Boccara, E.Goles, S.Martinez and P.Picco, eds. (Kluwer Academic Publisher, 1993), pp. 543-546.
- (39) R.H.Schonmann: Slow droplet-driven relaxation of stochastic Ising models in the vicinity of the phase coexistence region. *Communications in Mathematical Physics* **161** 1-50 (1994).
- (40) F.Martinelli, E.Olivieri, R.H.Schonmann: For 2-D lattice spin systems weak mixing implies strong mixing. *Communications in Mathematical Physics* **165** 33-47 (1994).
- (41) R.H.Schonmann: Theorems and conjectures on the droplet-driven relaxation of stochastic Ising models. in *Probability and Phase Transition*. NATO ASI Series. Series C: Mathematical and Physical Sciences - Vol.420. G. Grimmett, ed. (Kluwer Academic Publisher, 1994), pp. 265-301.
- (42) H.Kesten, R.H.Schonmann: On some growth models with a small parameter. *Probability Theory and Related Fields* **101** 435-468 (1995).
- (43) R.H.Schonmann, S.B.Shlosman: Complete analyticity for 2D Ising completed. *Communications in Mathematical Physics* **170** 453-482 (1995).
- (44) L.Chayes, R.H.Schonmann, G.Swindle: Lifshitz law for the volume of a two-dimensional droplet at zero temperature. *Journal of Statistical Physics* **79** 821-831 (1995).
- (45) R.H.Schonmann, S.B.Shlosman: Constrained variational problem with applications to the Ising model. *Journal of Statistical Physics* **83** 867-905 (1996).
- (46) F. Cesi, G. Guadagni, F. Martinelli, R.H.Schonmann: On the 2D dynamical Ising model in the phase coexistence region near the critical point. *Journal of Statistical Physics* **85** 55-102 (1996).
- (47) T.M.Liggett, R.H.Schonmann, A.Stacey: Domination by product measures. *The Annals of Probability* **25** 71-95 (1997).
- (48) R.H.Schonmann, N. Yoshida: Exponential relaxation of Glauber dynamics with some special boundary conditions. *Communications in Mathematical Physics* **189** 299-309 (1997).
- (49) P.Deghanpour, R.H.Schonmann: A nucleation-and-growth model. *Probability Theory and Related Fields* **107** 123-135 (1997).

- (50) M.Salzano, R.H.Schonmann: The second lowest extremal invariant measure of the contact process. *The Annals of Probability* **25** 1846-1871 (1997).
- (51) P.Deghanpour, R.H.Schonmann: Metropolis dynamics relaxation via nucleation and growth. *Communications in Mathematical Physics* **188** 89-119 (1997).
- (52) A.C.D.van Enter, R.Fernández, R.H.Schonmann, S.B.Shlosman: Complete analyticity of the 2D Potts model above the critical temperature. *Communications in Mathematical Physics* **189** 373-393 (1997).
- (53) R.H.Schonmann, N.I.Tanaka: Lack of monotonicity in ferromagnetic Ising model phase diagrams. *The Annals of Applied Probability* **8** 234-245 (1998).
- (54) R.H.Schonmann, S.B.Shlosman: Wulff droplets and the metastable relaxation of kinetic Ising models. *Communications in Mathematical Physics* **194** 389-462 (1998).
- (55) M.Salzano, R.H.Schonmann: A new proof that for the contact process on homogeneous trees local survival implies complete convergence. *The Annals of Probability* **26** 1251-1258 (1998).
- (56) R.H.Schonmann: The triangle condition for contact processes on homogeneous trees. *Journal of Statistical Physics* **90** 1429-1440 (1998).
- (57) D.Ioffe, R.H.Schonmann: Dobrushin-Kotecký-Shlosman theorem up to the critical temperature. *Communications in Mathematical Physics* **199** 117-167 (1998).
- (58) M.Salzano, R.H.Schonmann: The second lowest extremal invariant measure of the contact process II. *The Annals of Probability* **27** 845-875 (1999)
- (59) E.Kira, E.J.Neves, R.H.Schonmann: A Note on Percolation in a Voronoi Competition-Growth Model. *Journal of Statistical Physics* **92** 755-764 (1998).
- (60) R.H.Schonmann: Stability of infinite clusters in supercritical percolation. *Probability Theory and Related Fields* **113** 287-300 (1999).
- (61) R.H.Schonmann: Metastability and the Ising model. in *Proceedings of the International Congress of Mathematicians, Berlin 1998, Vol. III*. G.Fischer, U.Rehmann, eds. (Documenta Mathematica, Extra Volumes, 1998), pp. 173-181.
- (62) R.H.Schonmann: Percolation in $\infty + 1$ dimensions at the uniqueness threshold. in *Perplexing Problems in Probability. Festschrift in honor of Harry Kesten*. M. Bramson, R. Durrett, ed. (Birkhäuser, 1999), pp. 53-67.
- (63) O.Häggström, Y.Peres and R.H.Schonmann: Percolation on transitive graphs as a coalescent process: relentless merging followed by simultaneous uniqueness. in *Perplexing Problems in Probability. Festschrift in honor of Harry Kesten*. M. Bramson, R. Durrett, ed. (Birkhäuser, 1999), pp. 69-90.
- (64) A. van Enter, C. Maes, R.H.Schonmann and S. Shlosman: The Griffiths singularity random field. in *On Dobrushin's way: from probability theory to statistical physics*. R. Minlos, S. Shlosman, Y. Sukhov, ed. (AMS, 2000), pp. 51-58.
- (65) O. Häggström, R.H.Schonmann and J. E. Steif: The Ising model on diluted graphs and strong amenability. *The Annals of Probability* **28** 1111-1137 (2000).
- (66) L. Chayes and R.H.Schonmann: Mixed percolation as a bridge between site and bond percolation. *The Annals of Applied Probability* **10** 1182-1196 (2000).
- (67) R.H.Schonmann: Multiplicity of phase transitions and mean-field criticality on highly non-amenable graphs. *Communications in Mathematical Physics* **219** 271-322 (2001).

- (68) P. Bleher, J. Ruiz, R.H.Schonmann, S. Shlosman and V. Zagrebnov: Rigidity of the critical phases on a Cayley tree. *Moscow Mathematical Journal* **1** 345–363 (2001).
- (69) R.H.Schonmann: Mean-field criticality for percolation on planar non-amenable graphs. *Communications in Mathematical Physics* **225** 453–463 (2002).
- (70) L. R. Fontes, R.H.Schonmann and V. Sidoravicius: Stretched exponential fixation in stochastic Ising models at zero temperature. *Communications in Mathematical Physics* **228** 495–518 (2002).
- (71) R.H.Schonmann: Einstein relation for a class of interface models. *Communications in Mathematical Physics* **232** 279–302 (2003).
- (72) T. Bodineau, R.H.Schonmann, S. Shlosman: 3D crystal: how flat its flat facets are? *Communications in Mathematical Physics* **255** 747–766 (2005).
- (73) L. R. Fontes, R.H.Schonmann: Threshold $\theta \geq 2$ contact processes on homogeneous trees. *Probability Theory and Related Fields* **141** 513–541 (2008).
