• No electronic devices or notes are allowed.

• Bring Student ID and pencils and/or pens.

• Know your Section Letter (A or B)

• The format of the midterm is similar to that of the practice exam.

• The first problem with several parts is multiple choice testing on historical/factual material. Historical material is taken from either 1.7, 2.6, 3.6 in the text or from the supplementary material presented in class and posted on the course page.

• There are 3 problems (possibly with several parts) of **roughly** the same difficulty as homework problems that will test material presented in lectures or occurring in the homework. Most of the material is in chapters 1-3, 5 but certain sections and topics there were not covered while some supplementary material was given, most of which is on the slides. You are responsible for understanding all assigned HW problems.
