2. Comments:

Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Extremely helpful all the time. Explained concepts thoroughly and was very clear and effective.
- He was a knowledgeable T.A. although since he knew the material so well he would rush through some problems which can confuse the student at times. During his office hours he was very helpful and kind.
- Intended to teach by providing harder problems of what was being learned, so you can understand how apply what you're learning in class. Always answers any questions you may have and helpful.
- Kureh was an amazing TA who knew exactly what he was talking about and was very good at teaching and explaining problems to the class. I would love to not only have him again as my TA, but also as a Professor for any math class because I trust that I would learn effectively through him as I did this quarter. He took the time to hold reviews for every test for all students and even took the time to prepare practice exams for us in preparation for our tests. The only negative thing I could think of is that sometimes he skips steps when explaining problems on the board, but I'm honestly just nit-picking and the steps that he skipped had minuscule need to be written out on the board anyway.
- My T.A. is honestly one of the best math TA's. He is very helpful and knowledgeable about the material. Overall, I really benefited from being in his class.
- Not to make the example problems super easy but not super hard either.
- The style of teaching of the TA is very effective, the worksheets provided by the TA were very helpful as well.
- This teaching assistant really cared about teaching his students all of the material. His worksheets were extremely helpful, and they helped out a lot with studying for the examinations as well as understanding the homework problems.
- Very approachable and accessible. I appreciate the worksheets and the review sessions as well. I wish we had less problems to do during section so we can have enough time try to do them all before we go over them. Or maybe only go through the problems people had trouble with could save some time to talk about things we didn't understand in lecture in the end.
- Yacoub Kureh makes sure that students understand the chapter section well enough to complete math problems. Although the worksheets he gives out during discussions as well as the practice midterm, don't exactly help when taking the real exam. It would've been more helpful if he went over problems that would actually be on the exam. But overall, amazing and very helpful TA!
- Yacoub is a great TA, he explains things clearly.
- Yacoub is an extremely helpful and dedicated TA. He is willing to go the extra mile when it comes to helping you understand the material. He is willing to stay past his office hours to make sure you understand everything. He held detailed review sessions for each of our midterms, which I'm sure was not required of him, but they were very helpful and I am grateful for that. He is also very approachable and patient. Yacoub is a great TA and I'm lucky I had such a great TA during my first quarter at UCLA.
- Yakoub is f****** great. He always holds his office hours and is always there to help students, gives you review material during discussion, and shows different ways to solve the problems (just in case you find one way that's easier than the other). He held review sessions for our midterms to help everyone (this includes students who weren't in his discussion; he invited everyone) prepare for the midterms. He did
much to make sure he available to help out with his students, whether it'd be during discussion or during office hours. Sometimes I couldn't go to his office hours, so I always emailed him and he was very quick to respond. Very helpful, very effective, very recommended. Yakoub is great, and a very great TA.
