2. Comments:

Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Approachable.
- Explanations of problems were great and helpful.
- He is a great TA. He helps out outside the classroom too which helped me keep up with the course.
- He took the time to go over all problems, but sometimes he didn't exactly go step by step for some clarification.
- He was very helpful to the students, always had a ton of practice problems to go through during sections. Before both of the midterms he also held review sessions which were very helpful. It was awesome that the textbook was online and free.
- I don't think there was anything wrong with Yacoub's teaching style. I really liked the midterm practice exams he would hold.
- Mr. Kureh was an extremely great T.A. I never missed a discussion because I knew that they would always help and prepare us for homework problems and exams.
- My TA was extremely helpful. He always reminded us that he had office hours right after discussion, and not only offered his help to go over homework problems, but took the time to make up extra examples to help us understand the concepts more. He is extremely patient when it comes to helping us, he makes sure we understand every problem. He breaks down the problems as much as he can to make it easier for us to understand the material. He even makes his own practice test, which were always very helpful. He uses class time very effectively, and try to cover all of the concepts. He lets us work on our own and with our classmates to see how much we know and then will work out the problem with us which I think is great because this allows us to see how much we know without just getting the answer handed to us. Who ever has him is very lucky!
- One of the best TAs out there. He really does care about the students passing and he goes out of his way to help us, especially if we do bad on a test.
- Really good T.A. was very helpful during his office hours.
- The worksheets were very helpful and going over problems really clarified everything. Over all your methods were not hard to understand and you simplified each topic. Your knowledge of the material was extensive and it was clearly presented to the class during discussion.
- Y.H. Kureh is an extremely helpful TA who cares for his students. He provided us with midterm review sessions for both midterms, something other TAs did not do. He goes over problems in detail and is easy to approach if needed. Would recommend.
- Yacoub is great at clarifying problems from lectures and myopenmath. Class discussions provide more time to practice/review what we learned the previous week. His office hours are very productive and helpful.
