2. Comments:

Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Best TA I've ever had. He is so helpful and knowledgable in what he teaches. He is always available to help his students, and even those who are not his students. He always makes the time!

- He is an amazing TA and he is always will to help with homework questions during office hours. Also, he always try to make sure we understand the material.

- He was very kind and very helpful in class and being taught by him was an enjoyable experience

- Kureh was the best TA I've had! He spent so much time helping us review and really made a difference for me this quarter.

- Maybe perhaps having open note midterm/test. Some people are good at solving problems, but they sometimes need the little boost or example that will help them get started on the problem.

- My T.A. for Math 3A (Kureh) was extremely helpful during discussion sections. He always had worksheets ready for us and would explain the problems thoroughly. He was very helpful during office hours, as well.

- The only issue with this section is the fact that the TA had his two sections the same day one 10 minutes after the other one and they were located on places far from each other so he would always have to run to make it on time or be a few seconds late.

- The worksheets he distributed were helpful in understanding some of the hw problems. When explaining the answers to the midterms he was very clear and always open to questions.

- Yacoub Kureh is a great TA, he dedicates a large amount of his time to help students in office hours and beyond. His review sessions are very helpful and his teaching methods are easy to understand and very effective.

- Yacoub has great sections and clarifies a lot of points for me that I have during lecture. I just wish he accepted questions from students about homework, midterms, etc during section.

- Yacoub is a very knowledgeable TA and his discussion section helped me better understand the course material. One of the things I found to be the most helpful was him preparing a worksheet of the topics covered that week and going over it as a class. You can tell he cares about his students' learning and helping them prepare for both the midterm and final.

- Yacoub is an incredible TA. His passion for math is evident through the way he leads his discussions. He creates his own practice worksheets to hand out during sections, which are really helpful in reviewing and retaining the concepts learned in lecture during that week. He also goes above and beyond in creating his own practice exams and hosting exam review sessions.

- Yacoub is an outstanding TA. I absolutely love the way he teaches. He is also very funny. I could totally see him as a professor in a few years, he would be amazing and any student would be extremely lucky to have him! If all TAs were like him the world would be a better place.

- Yacoub is incredible. I have no doubt in my mind that he will make a great mathematics professor, regardless of where or what material he will be teaching.
Yacoub was an excellent TA. He always went over what we did in lectures and explained everything so well! I would recommend him to other students!

Yacoub was very knowledgeable of the material
