Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Doing practice problems helps to bring the material together.
- Good TA, office hours weren't helpful at all, but discussion sections were always worth my time and very insightful.
- Great course. Effective teaching from both the professor and TA in that there was a good balance of theory and examples. My only wish is that there could've been a programming element in this course, but that's just me I guess.
- Radke's section reviewed course ideas and summarized to help do the homework. Not much more that you can achieve in an hour section every week. His lectures were always well prepared.
- Very helpful TA. One of the best math TAs I have had as a UCLA student.
- Very helpful and patient. Definitely learned a lot from him.
- You were very helpful!
