THE BULLETIN OF SYMBOLIC LOGIC
Volume 11, Number 2, June 2005

PREFACE

AKIHIRO KANAMORI

The several articles in this issue are expanded versions of invited talks given at the Special Session on Gödel and Mathematical Logic in the 20th Century at the Annual Meeting of the Association for Symbolic Logic held at Carnegie Mellon University, 19–23 May 2004. The special session was organized at the behest of the program committee for the meeting by the editorial board for the final volumes of Gödel's ***Collected Works***: Solomon Feferman, John W. Dawson, Jr., Warren Goldfarb, Charles Parsons, and Wilfried Sieg. The speakers, in order, were: Martin Davis, John W. and Cheryl A. Dawson, Solomon Feferman, Warren Goldfarb, Wilfried Sieg, William W. Tait, and Donald A. Martin. Feferman suggested devoting an issue of this journal to these articles and endeavored to get them expeditiously aired and submitted.
