

Marine Physical Laboratory

Summer Internship Program 2015

The Marine Physical Laboratory (MPL) is an organized research unit of the University of California, San Diego (UCSD) and lab at the Scripps Institution of Oceanography.

Originally established as a Navy-orientated research laboratory in 1946, MPL has maintained a strong multidisciplinary research program consisting entirely of sponsored projects, with a large sponsorship from the Department of Defense (DOD) and the National Science Foundation (NSF).

MPL is currently seeking applications for its 2015 Summer Internship Program. Applicants should be inquisitive and motivated first, second or third year undergraduate students with a strong background in quantitative science with majors in Marine Science, Applied Mathematics, Chemistry, Physics, and Engineering. Applicants must also be U.S. citizens or permanent residents.

R/V FLIP (FLoating Instrument Platform), developed and still maintained by MPL for marine research, represents a novel approach to achieving more precise observations on board a vessel with its unique "flipping" design
