THE BULLETIN OF SYMBOLIC LOGIC
Volume 3, Number 4, Dec. 1997

7TH SCANDINAVIAN LOGIC SYMPOSIUM

CO-SPONSORED BY THE ASSOCIATION FOR SYMBOLIC LOGIC

Uppsala, Sweden, August 18–20, 1996

The 7th Scandinavian Logic Symposium was held at Uppsala University from August 18 through 20, 1996. The symposium was organized by the Department of Mathematics and the Department of Philosophy of Uppsala University. Financial support was received from the Wallenberg Foundation (for special invited lecturers), the National Committee of Logic, Methodology and Philosophy of the Royal Swedish Academy of Sciences, and from the Departments of Computer Technology, Computing Sciences, Mathematics and Philosophy of Uppsala University. The program committee consisted of Edward R. Griffor (Uppsala), Per Lindström (Göteborg), Sten Lindström (Umeå), Krister Segerberg (Uppsala), and Viggo Stoltenberg-Hansen (Uppsala). The abstracts will be published in *Theoria*.

Invited talks were given as follows:

Stål Anderaa (Oslo), *A Traktenbrot inseparability theorem for groups*.

Peter Dybjer (Göteborg), *Normalization by Yoneda embedding* (joint work with D. Cubric and P. J. Scott).

Abbas Edalat (Imperial College), *Dynamical systems, measures, fractals, and exact real number arithmetic via domain theory*.

Anita Feferman (Stanford), *Writing biography: two passionate logicians*.

Solomon Feferman (Stanford), *Three conceptual problems that "bug" me*.

Robert Goldblatt (Victoria, New Zealand), *The algebra of the lambda calculus*.

Yuri Gurevich (Michigan), *On finite model theory* (*and beyond*).

Klaus Grue (Copenhagen), *Stable map theory*.

Sven Ove Hansson (Uppsala), *The closures of operators in belief revision*.

Lauri Hella (Helsinki), *Generalized quantifiers and descriptive complexity theory*.

Robert K. Meyer (Australian National University), *Extension reduction II* (joint work with R. Sylvan).

Petri Mäenpää (Helsinki), *Program synthesis in type theory*.

1079-8986/97/0304-0004/$1.20

Dag Normann (Oslo), *Totality aspects of domain theory*.

Volodya Shavrukov (Amsterdam), *Diagonalizable algebras of formal theories*.

There were also 14 contributed talks and one paper presented by title.

For the Program Committee
