ERRATA

VOLUME 3

Page 230. The unfortunate placement of an overzealous negation sign mangled and changed the meaning of all twelve, displayed formulas of the article *Logical consequence revisited* by José M. Sagüillo on this page. The formulas were printed as

Wrong: $$\bigcap_1^2(\beta^0 \to \overline{\bigcup_1^1 \in_{1,1}^1}), \ldots, \bigcap_1^2(\delta_1 \to \overline{\bigcup_1^1 \in_{1,1}^1}),$$

and they should be

Right: $$\bigcap_1^2(\beta^0 \to \bigcup_1^1 \overline{\in_{1,1}^1}), \ldots, \bigcap_1^2(\delta_1 \to \bigcup_1^1 \overline{\in_{1,1}^1}).$$

Page 383. The last reference in the abstract *Semi-active learning* by Dr. Leona Fass, for the 1996-97 Annual ASL Meeting at MIT, was mis-formulated, so as to suggest that two of the five persons listed were its authors while the remaining three were editors of the volume. Actually, all five were editors, and the full, correct reference is as follows:

[4] Valdes-Perez, R. and L. Darden, J. Lederberg, H. Simon, D. Sleeman, (Eds.), ***Notes of the AAAI Spring symposium on systematic methods of scientific discovery***, Stanford, March 1995, released as AAAI Press SS 95-03.
