ERRATUM

VOLUME 4

p. 461. In the abstract *On initial segments of computable linear orders* by R. Coles, R. Downey, and B. M. Khoussainov, the statement of the theorem has the wrong subscript, Π^0_1 instead of Π^0_2. The correct statement is as follows:

Theorem: There exists a computable linearly ordered set with a Π^0_2–initial segment which does not possess a computable presentation.
