2. Comments:

2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Amazing TA, takes the time to go through multiple HW/test questions in great detail. Organizes review sessions, and overall, extremely helpful and approachable.

- BEST TA EVER - Ben was extremely friendly, helpful, knowledgable, and just genuinly interested in making sure everyone learned the content well. He went up and beyond when it came to TA duties: explaining any and all questions in the course extremely well, hosting both extra office hours beyond the minimum requirement and hosting extra review sessions for the exams, and still being fair. He helped make me genuinely enjoy this class more than I otherwise would have (this is not intended to be a negative statement against the professor/instructor). I know he's graduating but I would definitely take classes with Ben again if it were possible.

- Ben has been super helpful throughout the quarter during discussions, OH, and review sessions. He tries his best to go over any questions we have for class materials and hw, and is patient with any confusion as well. His review session before the midterm was also very helpful in helping me prepare for the course. overall, great TA!

- Ben is absolutely amazing. I don't think I've had a better TA at UCLA than Ben. He is amazingly helpful and has been there to provide help for ANYTHING that I had issues with. His office hours were incredibly productive and he had really good review sessions. I really do not think I would have made it to this point in this course without Ben. Thank you so much Ben and I wish you the best in your job and future!

- Ben is an absolute G and probably the best TA at this university. He absolutely carried me through this

course and I wouldn't have been able to understand half the content without his discussion and office hours. He walks through problems very clearly and is always willing to answer questions and clear any confusion. He is excellent and one of the best TA's I've ever had.

- Ben truly made probability, something I've historically struggled with, easier to understand and was also very helpful during office hours.

- Ben was a great TA. His office hours were always super helpful and he was always to helping out students with specific questions. In his discussion sections when he would go over material learned in class i feel like i would learn a lot more from him than the actual professor

- Ben was super helpful in discussions and office hours because he'd help us through the hard homework problems.

- By far the better TA than the other section. Friends from other classes would come to this discussion vs. the other bc Ben rocks!

- Did in excellent job responding to emails, and being available outside of regularly scheduled instruction or discussion time.

- Did not utilize the TA as a resource for this class this quarter

- I loved Ben! He was incredibly helpful as a teacher and highly receptive to his students. I especially loved how he was able to explain complex concepts in a simpler manner. I can confidently say that I would not have learned nearly enough if it weren't for Ben!

- I loved my TA this quarter! He was super helpful in discussion and made sure that we were covering topics and questions that were relevant to us. I wish that there were notes that we could access afterwards because I was sick one week and didn't really know anyone to get notes from. But in general really loved his teaching style and appreciated the review sessions that he put on.

- I never went

- I never went to discussion so not entirely sure.

- I really appreciate the help from Ben that he made everything clear and really tred to help the students outside of classes.

- I thought Ben was excellent. Really helpful in every discussion section.

- NA

- One of the best TAs ever. Very helpful. Office hours and discussion were great. Wishing you the best of luck!

- The TA discussion and office hours was very helpful. He always supported students and was clear explaining HW problems in OH.

- The TA was very helpful in our discussion but I feel like it would be more helpful if it was structured in a way where we had worksheets with practice problems.

- The discussion sections were super helpful, and the TA always was open to questions from the students. He really made the course content more manageable and gave us description of how it could be applied. I thoroughly enjoyed the discussion sections and found them to be a good use of my time. The TA was extremely knowledgable on the subject matter and explained everything in simple terms.

- The professor was a great teacher. No suggestions.

- ur a great TA
