2. Comments:

2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Cecilia is obviously very knowledgable. I wish there were review sessions before exams, at least for the final. However, her teachings and attention to detail are very appreciated. Proofs have so many steps and even when full credit was granted, she still offered how we could make our proofs better.

- Cecilia was such a great TA. She was super helpful during office hours and was really patient when answering all of my questions. She also was really good at explaining the concepts and writing out proofs. I learned a lot from going to her discussions and office hours.

- I think this TA was pretty helpful.

- It would have been more helpful if TA had more office hours earlier in the week.

- Super helpful!! Discussions were held on Zoom all quarter due to COVID and I know it's hard to stay energetic talking to a blank screen, but the TA was always engaging and took time to answer questions. The same was true during office hours, super helpful and eager to help... really made this course better.

- TA is really good, and she always gives us a lot of examples to help us understand the course materials.

- The TA really went above and beyond. She was incredibly helpful and, for example, sent emails after each homework assignment to discuss common errors and ways to improve. During discussions she clearly went over things and did not skip any steps in her explanations. I only wish I had attended more discussions and gone to office hours more.

- cecilia was very helpful and nice; she explained ideas thoroughly and made sure everyone understood the material. discussions were engaging and aided in conceptual understanding of course material. 10/10 would have her as my TA again

Profile

Name of the instructor: C. HIGGINS

Name of the course: 22W: MATH 131A DIS 2A: ANALYSIS
(Name of the survey)

Values used in the profile line: Mean
