- Cecelia is the best math instructor I've ever had at UCLA. I actually had her as a TA when I took Math 61 4 years ago. Both times Cecelia has been incredibly patient, nice, and helpful. She always looks out for her students and makes sure to explain as best as she can. The class was smooth and enjoyable with her teaching it! Good luck finishing up at UCLA and at Berkeley!

- Cecilia is a wonderful teacher, her grading, tests, and assignments are all fair for a class catered to majors not necessarily in exclusively STEM. The small class size and Cecilia's approachability made it feel not intimidating to ask questions when lost on a topic. Fantastic job.

- Cecilia is one of the best professors I've had for math. I have always sucked at math and I always make silly mistakes in a testing environment for math but I've greatly enjoyed attending lectures and participating in this class. I've also never felt penalized in this class for struggling, the homework is just as dense as it needs to be for you to identify what you don't understand and to learn but not to the point where you're doing busywork. That is incredibly refreshing and made this class a great class to end my senior year on!

- She was always very approachable and down to earth, keen to help and clarify. Exams so far felt reasonable, I appreciate that they mostly reflected stuff we already saw in homework or lecture decently closely.

- The instructor for this course is extremely knowledgable and super friendly. She is so good at breaking down concepts and explaining everything in a way that is easy to understand. Outside of lecture, her office hours are also super helpful. I really like how she also posts her notes after lecture. Overall I think

she is an amazing instructor.

- Things to note:
  - I liked the professor's teaching style.
  - She provided notes after lectures and they were easy to understand.
  - Exams were reflected in the professor's notes & lectures.
  - The textbook didn't really seem necessary in this class since the professor's notes & lectures were enough to understand & grasp the content.
  - Overall, great class and excellent professor.
