- Ben is always willing to help and often clarifies the material. He is a very kind person and loves math.
  - Ben was able to explain concepts in greater detail than Nam without making things confusing. I enjoyed that they always drew graphs to demonstrate the concepts visually. It was nice that they paused the recording to encourage students to ask questions. They also got pretty efficient at working through the problems in the time by pre-writing them.
  - He was not very accommodating for some of the questions on exams.
  - It's thursday and no one feels like talking, I don't blame the TA for not having an "interesting" class, still learned a couple things though
  - The TA was very friendly and accommodating to questions and concerns us students may have. They are also very knowledgeable in the subject and was able to create an overall excellent learning experience.
  - great class. thank you.
  - held great discussions and would always answer all our questions as well as post the recording. no complaints
