- Engaging and clear delivery of lectures, fair tests and grading schemes, nice personality.
- I think the textbook wasn't the best textbook. Of course, I have no authority at all on the subject, but maybe there is a better textbook with better structure and more interesting problems. I think Professor made it all work despite this issue.
- Matt was an absolutely awesome instructor! He explained the material effectively, spoke to us as equals, was excited to answer questions about the material or pretty much anything else, and provided us with the resources to succeed (such as hw solutions and typed notes for the class). In particular, Matt spent a lot of time helping one of my friends progress on an individual unrelated project (in game theory), which just shows how much he cares. Other than that, he is charismatic and really a lot of fun, making attending class a wonderful experience.

Truly, he has all the makings of a wonderful teacher -- A++++

- The material of this class was very interesting and useful, but I think that there are several things that could be improved. I personally felt that the instructor was moving too quickly (especially since we even seemed to finish our material early) and pacing too quickly. I also felt that there were several points during the class where an important subject was glossed over, or the instructor assumed everyone would already know it just because a few students expressed that they did. I would also have appreciated at least a few homework solutions on all homeworks, since these were only available for the last few homeworks.
