1. UCLA Department of Mathematics:

1.1) How would you rate your TA as an effective teacher?

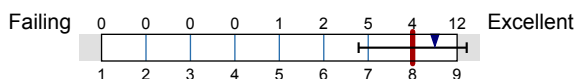

n=24  
 av.=8.58  
 md=9  
 dev.=0.78

1.2) How would you rate the availability and helpfulness of your TA outside of the classroom?

n=23  
 av.=8.48  
 md=9  
 dev.=0.9  
 ab.=1

1.3) What is your rating of this course independent of the effectiveness of the TA?

n=24  
 av.=8  
 md=8.5  
 dev.=1.22

2. Comments:

2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Excellent TA
- Great TA!! I was very impressed by how he went above and made worksheets for each discussion and that the worksheets were actually engaging. Overall a good course.
- He is a great TA that knows the material well and can explain it like an actual professor.
- He is very friendly and had enough Office Hours for students. He helped make the course material more appealing by handing out worksheets that made one think critically.
- He is very good at explaining math concepts in a way that is simple, easy to understand, and is also funny with the jokes that he sometimes put on his worksheets. His reviews are also very helpful and I appreciated all the effort that he put into teaching his discussions. PS: "America's Next Top Differential Model" is literally the best pun/joke.
- I did not like how this TA showed us different ways of solving problems than the way we learned in class. The professor would show us how to solve it and he kind of just stirred up confusion by showing us his own way of doing it. Although he probably just trying to be helpful, I do not think this was effective at all. I liked how he was prepared with lessons every single class, even though other TA's just let students ask questions the entire time. He was always prepared with handouts with practice problems and spend the entire discussion section reviewing them. I really feel like he went out of his way for us students.
- The TA was an excellent and always well prepared. Unfortunately his office hours always conflicted with my work schedule, so it was hard to meet with him on another time because he also had commitments.
- Very clear and good at explaining material. straightforward
- Yacoub is easier to understand than Professor Greene is.

- Yacoub is really good at explaining the material and helping us understand more complicated problems which is super helpful. He's awesome!
- Yacoub is very responsible and prepare lots of examples in class. He runs review sessions and often helps the students. He is clear and very organized. It is just that sometimes the examples are not very similar to the exam type questions and can be a little difficult.
- Yacoub was a dedicated TA who took the extra time and energy to make sure his students succeed. You could tell he was dedicated to student learning, even when it occurred on his own time. Thank you Yacoub, for all the extra study sessions!!! They really help
- Yacoub was an excellent TA. He went above and beyond to help his students understand the material. Every discussion, he would come in with a worksheet that included review problems and reiteration of new material. These worksheets were very useful and helped me learn the material taught better. I am very happy to have a TA who cared to see the students succeed and also made the material enjoyable to learn.
- Yacoub was the best. He understood the material very well, and helped prepare students to succeed in the class.
- good TA! very helpful, but kinda boring
- he was very smart and knew how to answer every question i had. he was approachable and made discussion enjoyable
- very helpful
